

Wingspan Approach - Improvement Roadmap

Phase 1 - Core Foundation (Stability & Usability)

Goal: Make the site reliable, secure, and user-friendly.

- User Authentication: Email + Google login (Firebase Auth)
- Profile Dashboard: Quick stats (recent logbook entries, BMI, mock test progress)
- UI/UX Enhancements: Clean homepage, card-based layout, dark mode option
- Mobile Optimization: Fully responsive for mobile/tablet
- Security: Firestore rules, HTTPS, form validation

Phase 2 - Pilot Tools & Logbook

Goal: Strengthen aviation-specific tools.

- Logbook Features:
 - Filters (aircraft type, simulator, IFR/VFR, night/day)
 - Export logbook as PDF/CSV
 - Charts: monthly hours, cumulative flight time, simulator vs real
 - Optional: Photo/attachment support, flight map visualization
- BMI & Health Tools:
 - Weekly tracker (BMI trend graph)
 - Aviation health checklist
- Aviation Tools:
 - Unit converters (nm ↔ km, ft ↔ m, knots ↔ km/h)
 - Flight planning calculators (fuel, endurance, crosswind)
 - Digital checklist templates

Phase 3 - Mock Test & Learning System

Goal: Make Wingspan Approach a complete training companion.

- Mock Test Generator:
 - Adaptive difficulty
 - Detailed answer explanations
 - Progress tracking with strengths/weaknesses
 - Timed tests, review mode, question bank import

- Study Resources:
 - Notes, flashcards, downloadable PDFs
 - Blogs on DGCA exam tips, pilot training abroad, license conversion
 - Bookmark/save articles, search function
- Gamification:
 - Badges (e.g., 10 tests completed, 100 logbook entries)
 - Leaderboard for mock test scores

Additional Enhancements

- Progress bars & quick stats on dashboard
- Tooltips & small guides for beginners
- Notifications & reminders for pending tasks
- Flight categories (solo, dual, simulator, night, cross-country)
- Basic analytics & insights on user progress
- Dark/Light mode toggle
- Quick export options (PDF/Excel)
- Feedback option for users
